# **What we can learn about China by Studying its 20th Century Opera**

*Dr. Igor Chabrowski (Universität Warschau)*

Prof. Chabrowski discusses his research about the transformation of the Sichuan opera. This period covers its historical development from the 18th century, across its transformation into a commercial entertainment during the Republic, and down to its nationalization by the Chinese Communist Party.

Chinese regional opera will be examined both as an art as well as a social institution going through social, legal, religious, political and economic change. This approach turns it into a tool for reading historical processes that took place on multiple social, geographic and cultural levels.
